17161 Beaton Road SE, Monroe, WA 98272-1034
Phone: 360-805-4930 • Fax: 360-863-0439

Research International was selected as one of a small group of world companies invited to participate, free of charge, in the JAIMA 2008 trade show by the Japan External Trade Organization, JETRO. This generous offer included free transportation to Japan, a prepaid hotel room for the term of the event, and a prepaid corner booth at the show.

JAIMA is the Japanese Association of Instrumentation Manufacturer's Association. Each year JAIMA sponsors this show to highlight the best Japanese and foreign instrumentation commercially available in Japan. This year, it attracted over 23,000 visitors. JETRO is a government-related organization established in 1958 to promote mutual trade and investment between Japan and the rest of the world.

In addition to displaying our SASS® 2300, SASS® 3000, SASS® 3010 and BioHawk® products at the booth, our new high volume aerosol concentrator/collector, the SASS® 4000/4100, was formally introduced to the market. Mr. Elric Saaski, CEO of Research International, gave a PowerPoint presentation on the product at a New Technology Seminar forum sponsored by JAIMA.
